

## **Bodycad and Hospital Innovations are proud to announce that they have agreed on a distribution agreement for Bodycad Reflex Uni™ and Bodycad Fine Osteotomy™ in the UK**

QUÉBEC, Can. (Feb. 9, 2021) – Hospital Innovations was founded in January 2008 with the objective to deliver products and services to the medical community in a way that is both innovative and sustainable.

Since that day, it has been supplying a growing range of specialist products for use in orthopaedic and corrective surgery for more than 13 years. We are thrilled that the combination of their experience and the patient specific solution from Bodycad will help improve the quality of life of many patients.

“This is an exciting partnership and we are pleased to be bringing this latest technology to the UK; improving patient care and clinical efficacy. ” Sarah Lister-Sims, Managing Director at Hospital Innovations

Leveraging the latest in 3D printing technology, BC Reflex Uni™ and BC Fine Osteotomy™ were developed by Bodycad using proprietary software algorithms and fully integrated production system. Bodycad has developed an innovative 3D image rendering, digital planning and production system to optimize personalized restoration of each patient’s anatomy. Bodycad’s proprietary software serves as the digital backbone to highly automate all processes.

“Bodycad’s indisputable expertise in the computer design of personalized solutions combined with the experience of Hospital Innovations will allow us to raise the success of personalized restoration in the UK” said CEO and Founder of Bodycad Jean Robichaud.

### **About Bodycad**

Bodycad is on a mission to revolutionize the world of orthopedics with proprietary software and orthopaedic solutions designed to consider each person’s unique anatomy. With surgeon-based planning capabilities, Bodycad realizes endless possibilities for surgeons to provide patients with the best possible care. Bodycad has a fully vertically integrated manufacturing facility based in Quebec City, Canada.
